AUGUST 29 8am to 2pm
TEST is August 29 at 1:30pm

Springfield EMS Classroom
972 Kansas Street
Springfield, CO 81073

Ham Radio Operators provide a critical role in public safety emergencies. Ham radio operators help people in distress, provide communications during disasters, assist local emergency agencies, provide emergency communications and Skywarn Weather spotters can report severe weather directly to the National Weather Service.

Ham Radio Operators also enjoy the use of the Amateur radio spectrum even when disasters are not happening.

For more information on Ham Radio visit www.arrl.org and www.ares.org. There is no cost for the class and Morse Code is not needed.

To register or for more information on the class call 719-523-6796 or email bacaec@aim.com
